

ATLAS AI

Your Grounded Financial Copilot

Bridging the gap between daily spending and long-term wealth.

The Problem

- Financial data is fragmented across banks and brokerages.
- Most users have no real-time link between spending and portfolio risk.
- AI assistants are often 'hallucinating' or generic, not grounded in data.
- Beginners lack actionable, personalized scenario planning.

The Solution: Atlas AI

- One Coherent Flow: Upload bank CSVs to unlock deep insights.
- Grounded Reasoning: Powered by NVIDIA NIM (Llama 3.1) for zero hallucination.
- Actionable Intelligence: Real-time anomaly detection and health scoring.
- Future-Proof: AI-driven scenario planning for goal achievement.

Dashboard Overview

Centralized view of cashflow, net worth, and AI insights.

REAL AI · DATA LOADED

What are my biggest expense categories

Based on the provided data, your biggest expense categories are:

1. Utilities: \$5,020.71
2. Transport: \$3,972.76
3. Food: \$4,540.79
4. Shopping: \$5,387.61
5. Health: \$4,896.35

These categories account for the majority of your expenses. However, if we rank them in order of highest spend, the correct order would be:
